

TAKING APIXABAN

(Also known as Eliquis®)

Your doctor prescribed apixaban to keep blood clots from forming

Apixaban along with other medicines will help prevent stroke

Apixaban is an oral anticoagulant and it is often called a “blood thinner”

Apixaban should be taken two times a day with or without food

A blood test to check your kidneys will be done prior to starting apixaban and at least every year

A common reason to take this medicine is atrial fibrillation

Atrial fibrillation is an irregular heart rhythm that can cause blood clots to form which can lead to stroke

Most people who have been prescribed apixaban to prevent stroke **take it for the rest of their lives**

TELL YOUR DOCTOR IF YOU HAVE:

Bleeding gums

Bruising too much

Nose bleeds

CALL YOUR DOCTOR OR GO TO AN EMERGENCY ROOM IF YOU DEVELOP:

Difficulty breathing or wheezing

Stomach pain/vomiting blood

Black or bloody stools

Severe headache with nausea

WHAT YOU CAN DO:

Take your apixaban at the same time every day, 12 hours apart

- Do not stop taking your apixaban without talking to your doctor
- Missing a dose can put you at risk for forming clots

If you miss a dose:

- If it is within 6 hours of usually taking it, take the missed dose
- If it is more than 6 hours, skip the dose
- Do not take two doses at the same time
- Never take an extra dose to catch up

Make an appointment with your doctor before your prescription runs out

- Tell your doctor or dentist that you are on apixaban if you need any surgery or procedure

Obtain a medical alert bracelet to indicate you are on apixaban - in case of emergency, it would be important for your health care team to know

Tell your pharmacist or doctor about all the medicines that you may be taking, including vitamins, herbal products or recreational drugs

Report any side effects to your doctor or pharmacist so that they can give you tips on how to minimize them

TALK TO YOUR HEALTHCARE PROVIDER IF YOU HAVE QUESTIONS ABOUT OR ARE HAVING TROUBLE TAKING YOUR MEDICATIONS
